### Focus on Safety

Safety is a very important issue at Port of Aarhus. The enclosed folder is a short guidance to you and your employees when solving tasks for Port of Aarhus. Please read the folder carefully and do not hesitate to contact us in case you have any questions.

Prior to solving tasks for Port of Aarhus, your employees and your subcontractors must be instructed in the safety regulations that apply.

We presume that your employees and your subcontractors are equipped with the required safety outfit when they arrive at the port to solve any task - whether big or small.

Please sign and return this letter, thus confirming that the above applies to our future cooperation.

Best regards

Poul Erik Jessen  
Head of Technical Dept.

I, the undersigned, have read and understood the folder Focus on Safety. I confirm that my employees and subcontractors have been instructed in the safety regulations in force prior to solving tasks at Port of Aarhus, and that they will wear the required and approved safety outfit.
